

## Trolleys

Given all the wet weather we have had recently the course is obviously getting very muddy in certain areas and this is clearly made worse by trolleys being driven through these areas.

The greens staff are doing all they can to protect certain areas but there is only so much they can do.

If at all possible we would ask that members look at the possibility of carrying their clubs over the winter.

We appreciate that this will not be possible for some members but would ask that those who need to continue using trolleys make every effort to avoid driving the trolleys through the worst areas.

We are all appreciative of the fact that we are able to continue playing eighteen holes of golf as often as we can throughout the winter and, hopefully, with these measures in place we will ensure that the course is in as good a condition as possible.
